Re: Moving the enclosed fence from back rear of lot to
Even with existing building

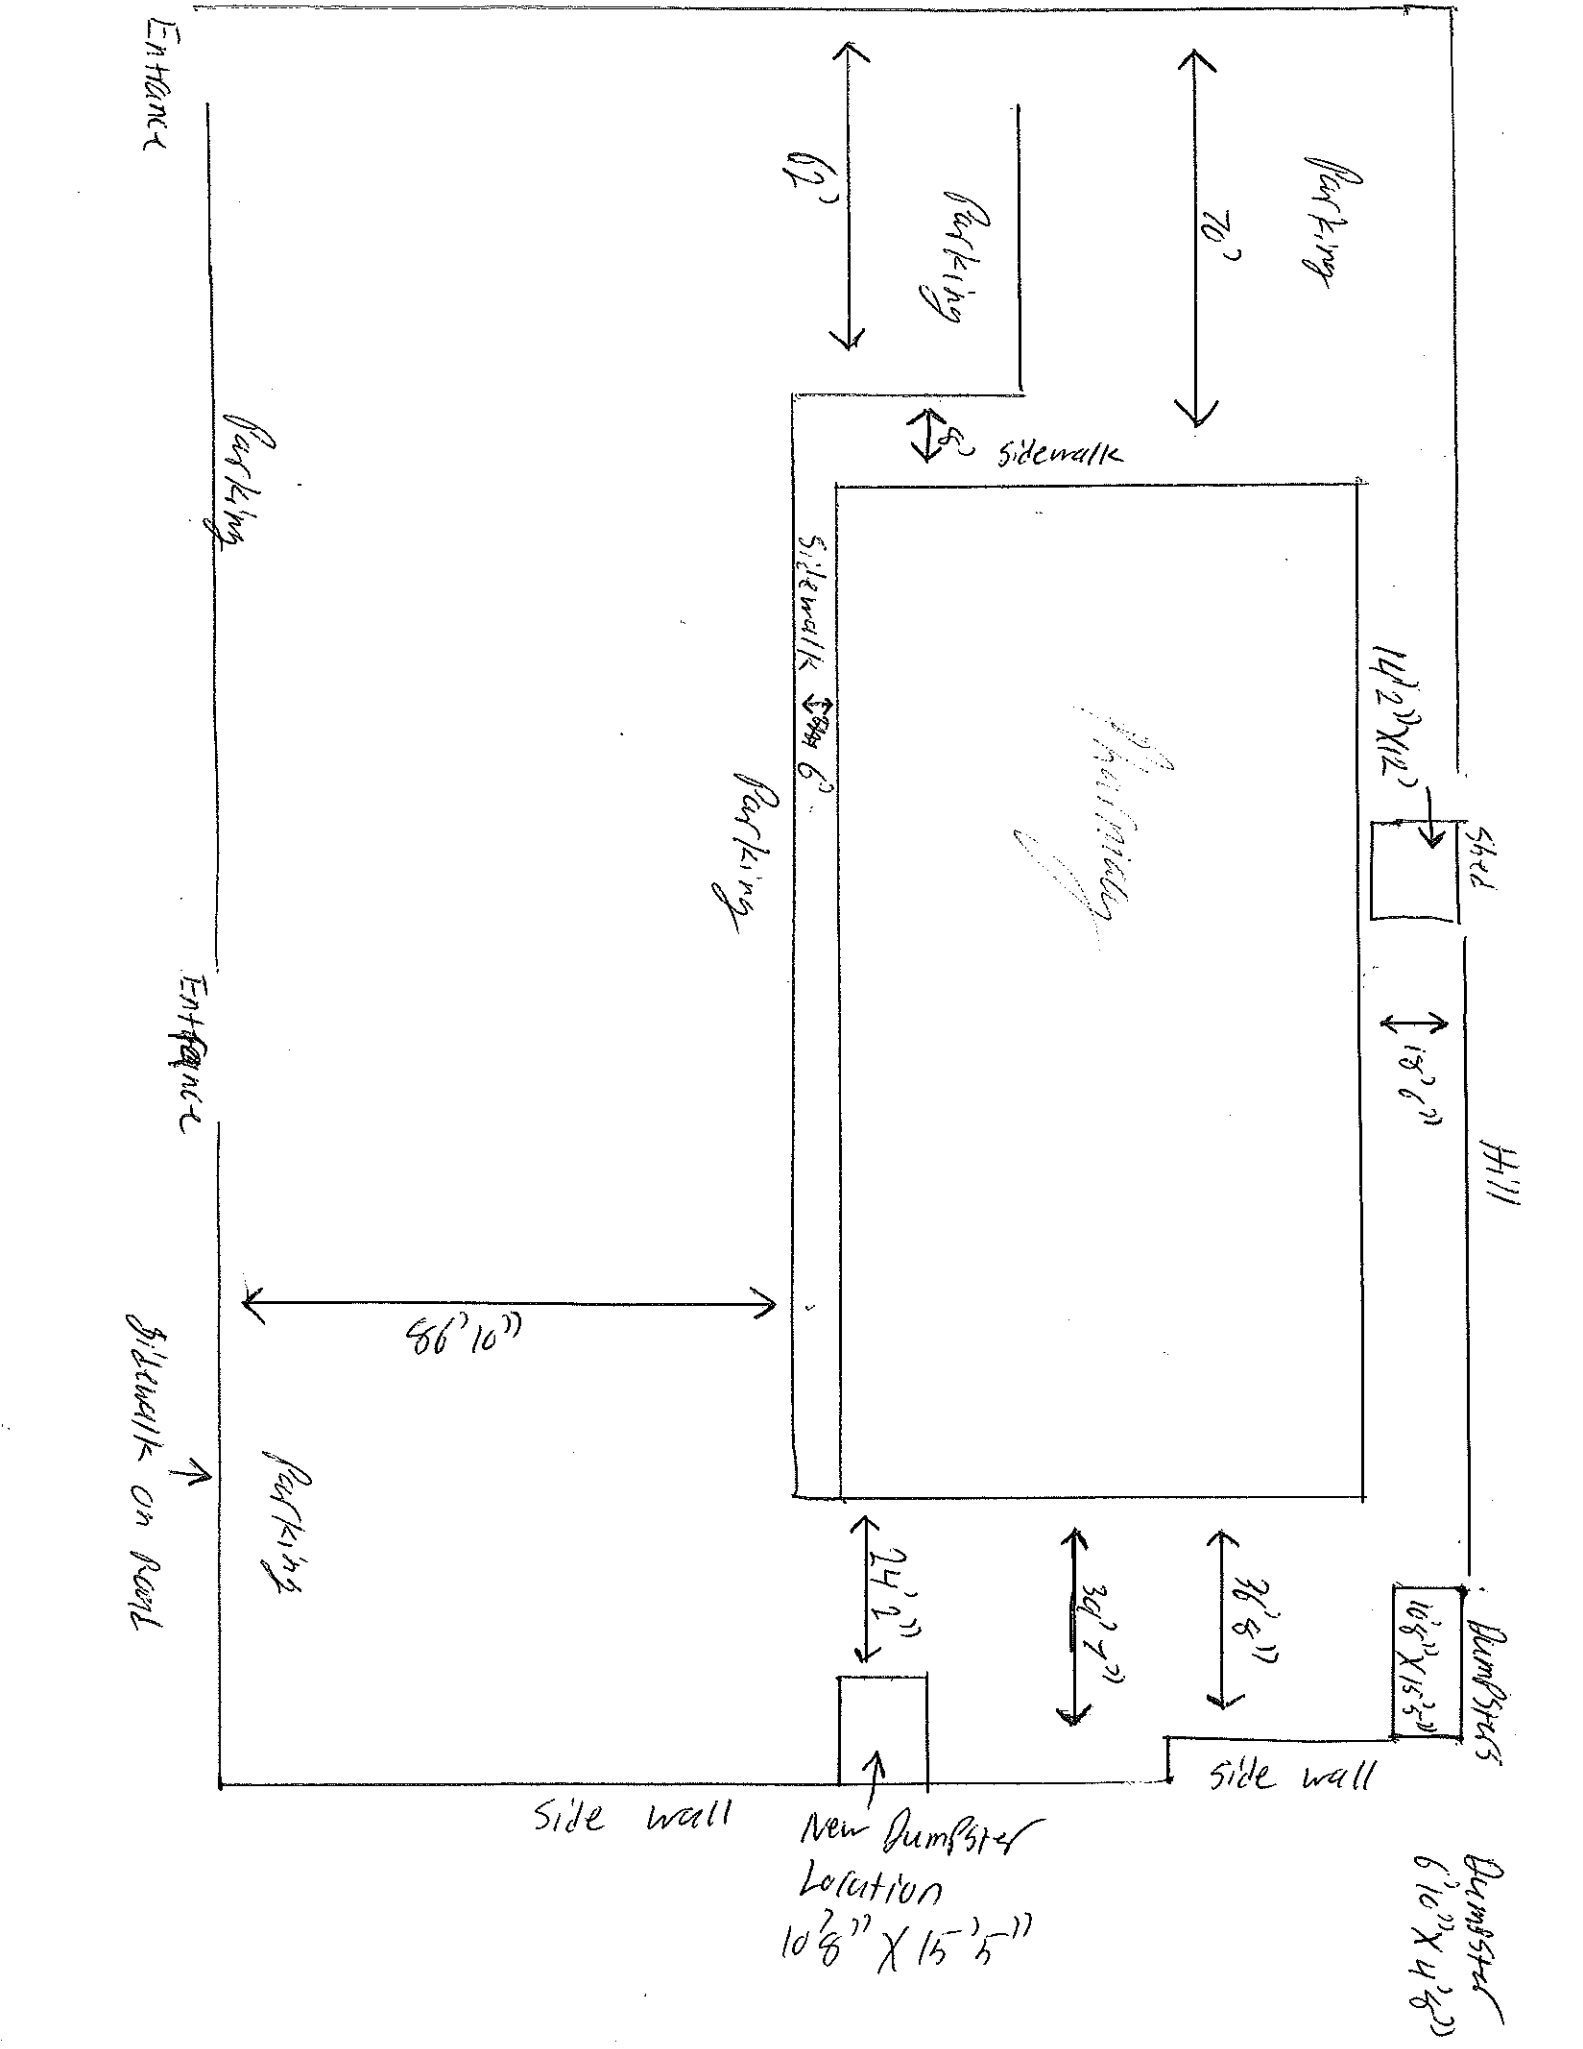

We are hoping for approval to move the fence enclosure to
Be even with the existing building as to create a safer area to remove the
Refuse, and not interfere with activity on side yard. We are looking at
applying for a permit to have a propane filling station, after we have created
the area up front. By moving the fenced area, we can put the propane filling
station in back of it, and this eliminates a dump truck from being near the
propane. So, the purpose is two fold, create a safer environment, and allow
for space for propane filling station.

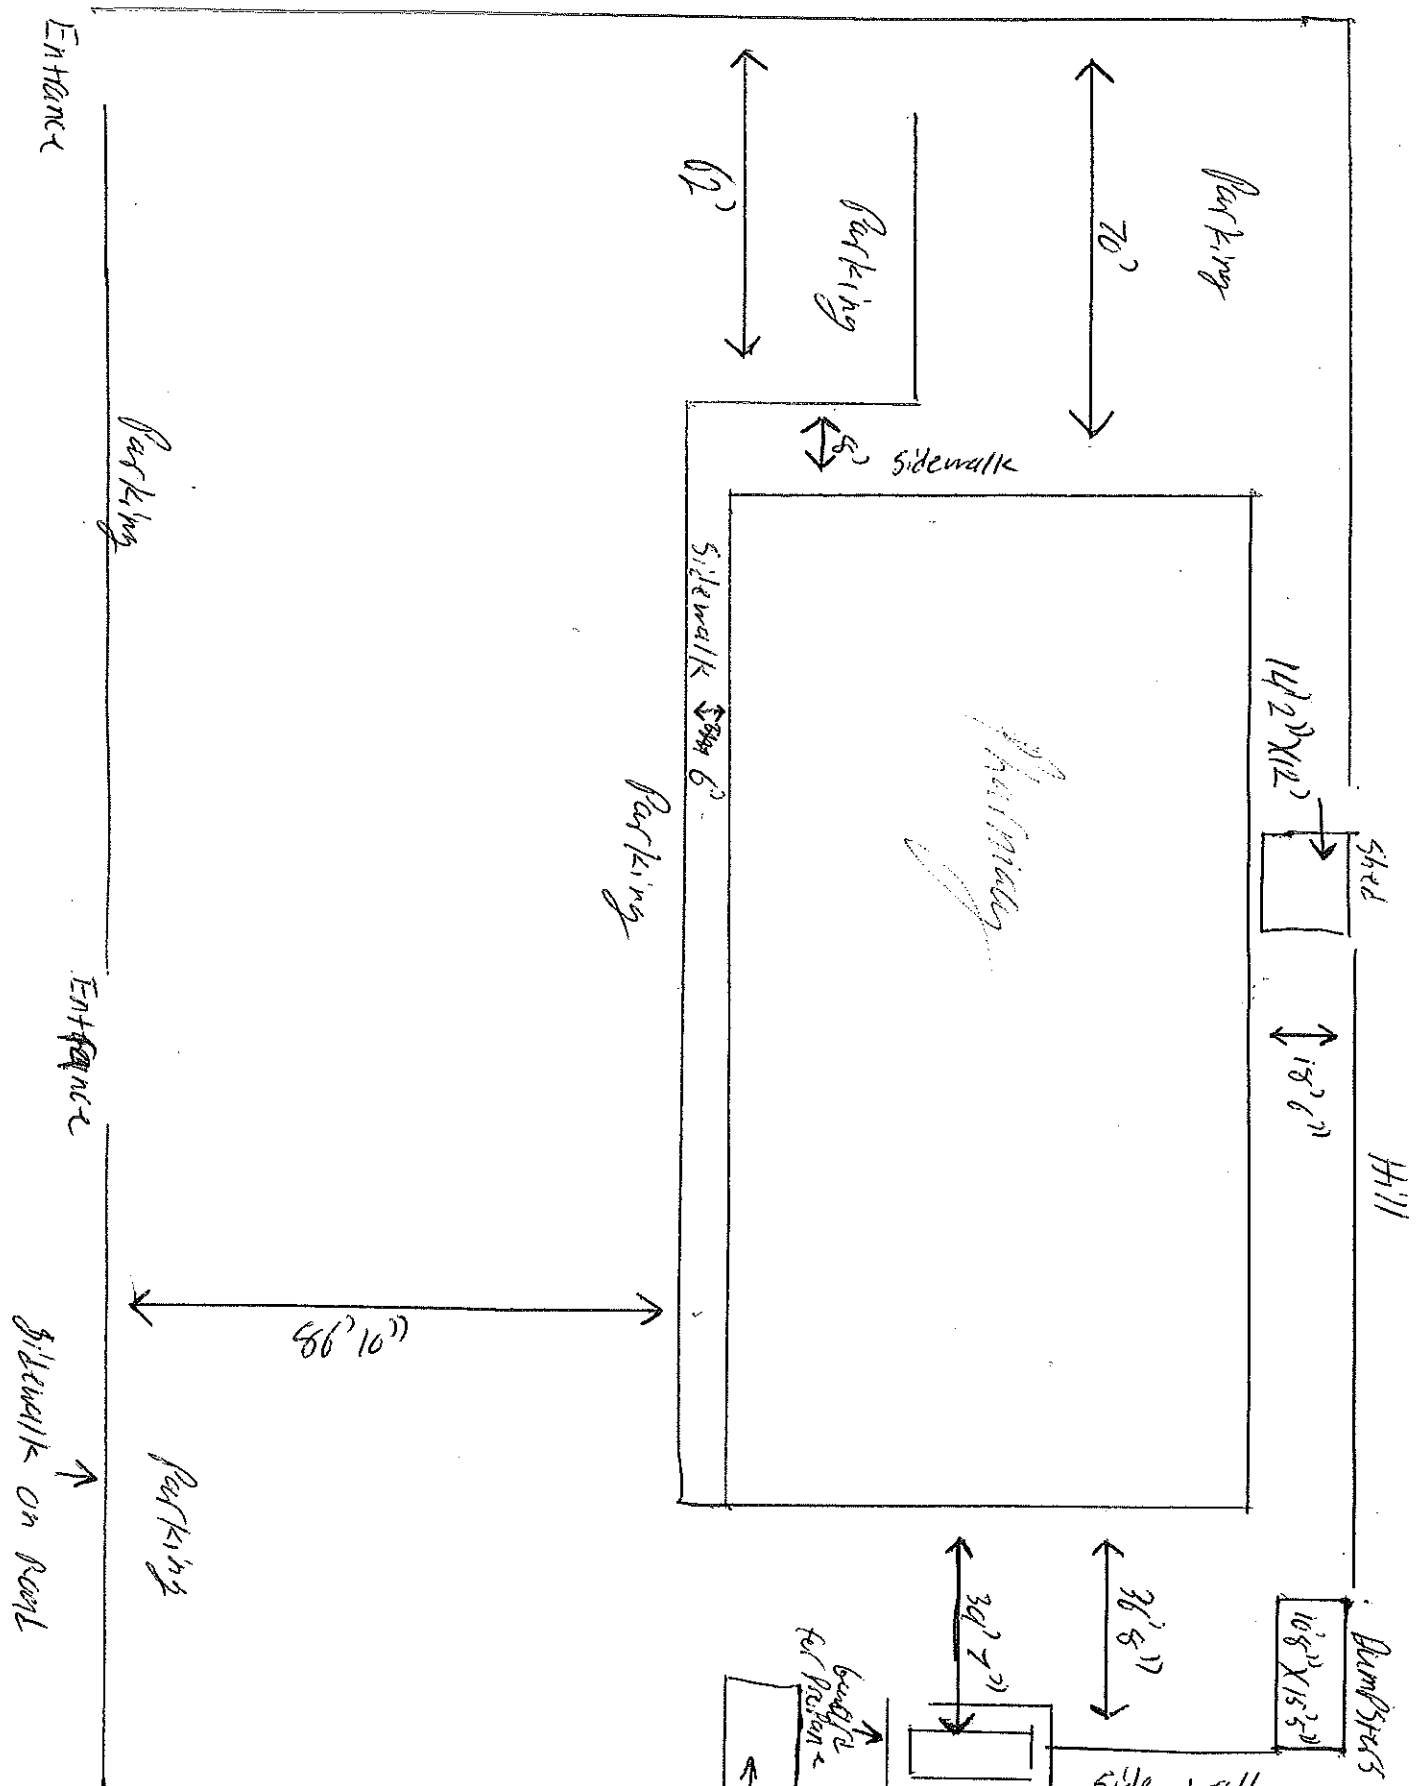

Thank you,
