Higganum, CT

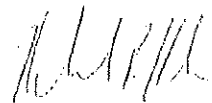

Dear Mr. Mularski,

Please be advised that our office has overseen the implementation of the design plan approved for the above referenced project. Our office has performed periodic site inspections and has had multiple conversations with the owners and contractor performing the work.

Pursuant to our close-out meeting with Yourself and the Owners on 7/29/22, this office finds that all the work has been installed / performed properly and with only slight modifications from the approved plan.

Please feel free to contact me with any questions you may have regarding this matter.

Very truly yours,

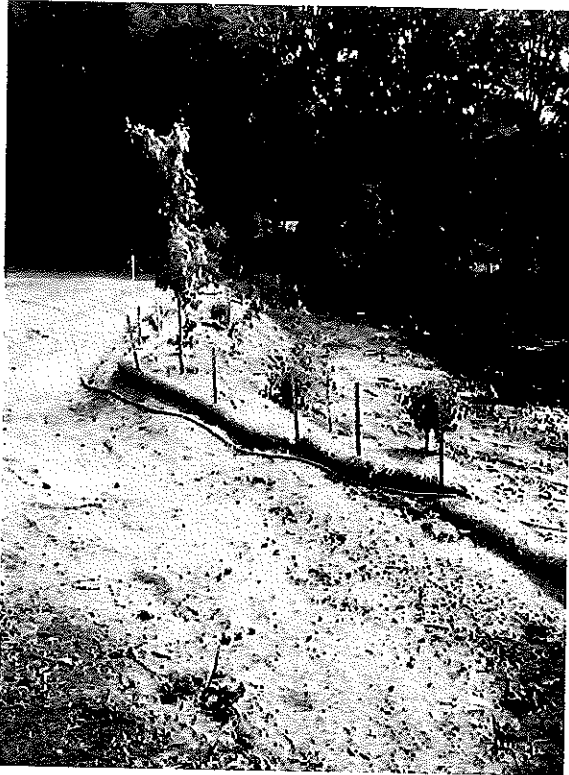

Michael P. Harkin, P.E.
Consulting Engineer
