

ADDENDUM TO RFP / 2017 PAVEMENT EVALUATION SURVEY

5/26/17

- 1.) There are approximately 98 miles of paved road. The survey should be curb to curb or edge of road to edge of road, for the entire length of road.
- 2.) Drainage deficiencies are to be identified in relationship to the road failure or condition. In some cases there are few or no drainage structures present. Essentially all road conditions that impact the road condition should be considered.
- 3.) Copies of data and imagery are not required.
- 4.) Three copies of the RFP will be sufficient.
