

## SECTION 26

### MIXED USES WITHIN A ZONE

- 26.1 Residential uses may be allowed in a Commercial Zone subject to the following:
- A. building may contain a combination of dwelling units and other permitted commercial uses.
  - B. In addition to the commercial uses and structures permitted by the Zoning Regulations, the Commission may approve five 5 dwelling unit for each one-half (1/2) acre of land contained in the commercial lot each dwelling unit not to exceed 2 bedrooms.
  - C. All other municipal and state requirements shall be satisfied.
  - D. Of the total gross square footage of the building, more than 25% shall be devoted to commercial use.
  - E. Dwelling units shall not be constructed in commercial zones located within the 100 year flood zone or areas subject to repeated flooding which could result in the periodic displacement of tenants because of temporary septic system failure and/or contamination of drinking water supplies.
  - F. That portion of a commercial lot which is classified as wetlands or watercourses shall not be included in the calculation and the determination of the number of dwelling units permitted.
  - G. The Commission shall have the discretion to determine whether dwelling units are appropriate in combination with certain commercial activities.
  - H. Efficiency apartments shall be considered one bedroom for the purposes of these calculations.
  - 1. Layout and landscaping of the residential units in combination with the commercial units shall be in such a manner as to minimize the impact of the commercial uses, parking service areas and streets on the residential units.

I. Commercial and residential units shall have separate entrances.

J. Gross floor areas requirements for dwelling units shall be *at least* the following:

Efficiency	500 Square
1	700 Square
2	900 Square

K. The site plan submitted with an application shall include:

1. Plans prepared by a professional engineer licensed in the State of Connecticut showing:

\*Details of the proposed water distribution/system supply;

\*Information defining the location and capacity of any storage tank(s) that may be required;

\*Calculations showing the estimated water demands of the entire development as proposed.

2. The number of residents to be served and the number of service connections installed;

L. Prior to the issuance of any zoning permit, the Applicant shall obtain a statement from the Director of Public Health stating that the proposed development has an adequate and potable water supply.
